

COLOUR CHART

If you have a specific colour you would like to match, please contact us as we are able to create special colours. (Once a special colour sample has been approved there is a minimum order of one pallet of 40 x 30 Kg bags)

The colours printed on this chart may be subject to small variations when reproduced on paper. To check the rendering colour, please consult with your local distributor/merchant or contact Parex directly who can provide you with a 48 colour guide or an individual 250 x 250 mm sample. The colours marked with an * indicate the shades with a solar absorption coefficient over 0.7. These strong shades are more sensitive to colour alteration, efflorescence, lime bloom and to climatic constraints.

Ensure that humidity and temperature conditions are taken into account when they are used.

Please note: The shade of the same colour may also differ dependent upon the finishing aspect; e.g. The colour of a Textured finish adjacent to a Smooth finish in the same colour may appear to look different when viewed next to each other.

The colour chart below has been sorted according to colour and reference number:

												
B10 Moonscape Terre de lune	B20 Sky blue Bleu ciel	B30* Azure blue Bleu azur	G60 Basalt grey Gris basalte				B00 Bright white Blanc du littoral	O80 Orange earth Terre orange	O90* Natural brick Brique naturelle	R10 Pearly pink Rose nacré
